

20<sup>th</sup> September 2021

Dear Parent/ Carer

### **Technocamps Workshop**

The purpose of this letter is to inform you about an exciting opportunity we are offering our year 10 students who have opted for Digital Technology. We are excited about the benefits for your children.

Technocamps is a digital programme with the aim of supporting digital upskilling. Technocamps work with students in order to increase their engagement with STEM subjects but in addition, provide training on new technology, both hardware and software. More details can be found here:

<https://www.technocamps.com/en/about-technocamps/>

The aim of this workshop is to provide a beneficial learning opportunity to students to enable them to feel confident with the software they need to use in order to complete their Digital Technology work. The software the students are required to use is new to them, therefore they will find the course extremely helpful. The course will allow them to understand the tools/techniques needed to complete their work.

In order for your child to fully benefit from Technocamps, some pupil information will be shared. Please be assured pupil information is shared only with a clearly defined reason and with an appropriate legal basis under data protection law. Please see the school's Privacy Notice for further information on how the school processes personal information about pupils.

Thank you very much for reading this letter.

Very best wishes

**Mrs T Morgan**
